

Position: Senior Laboratory Technician

Mosaic Biomedicals (www.mosaicbiomedicals.com) is a Barcelona-based company that develops personalized cancer treatments with a dual mechanism of action to eliminate cancer stem cells and reactivate the tumor's immune system.

Mosaic's innovative treatments are derived from a deep understanding of the tumor biology and aim to offer safer and more effective options to cancer patients.

Job Description

The scientific research conducted at Mosaic laboratories will help obtaining critical information about the biology of human tumors and the mechanism of action of our innovative treatments. We aim to translate our discoveries to a clinical ambit identifying molecular markers of diagnosis and prognosis, markers of response to therapies, and unveil new therapeutic targets against this deadly disease.

We are currently seeking to hire a Senior Laboratory Technician. Applicants should hold a Ph.D, B.Sc or M.Sc. in life sciences and must have a strong background in molecular and cellular biology including animal manipulation with at least 4 years of relevant laboratory experience. The laboratory technician will work in collaborative research projects involving *in vivo* experiments in mouse models of cancer, cell culture, Western Blot, citometry, immunohistochemistry and real time PCR among others. The candidate will be scientifically involved and responsible for the projects that he/she is working on. Fluency in English is required and computer literacy is essential.

We offer the opportunity to work in a fast-growing company with a top class experienced team that operates at the international level. He/she will be a resourceful and motivated teamplayer, who is comfortable working under pressure while remaining flexible, proactive, and efficient. He/she will have strong organizational skills and an attitude to handle information with accuracy, rigor and confidentiality.

The formal application should be submitted online to info@mosaicbiomedicals.com.

Suitable candidates are requested to submit:

- Cover letter with a declaration of interest.
- Curriculum Vitae, including full address, a contact phone number and e-mail address.

The call will remain open until suitable candidates are identified.
