

The Vall d'Hebron Research Institute (VHIR) is a public sector institution that promotes and develops the research, innovation and biosanitary teaching of the Vall d'Hebron University Hospital. Through the excellence of our research, we identify and apply new solutions to the health problems of society and we contribute to spread them around the world.

In April 2015, the **Vall d'Hebron Research Institute (VHIR)** obtained the recognition of the European Commission **HR Excellence**.

This recognition proves that VHIR endorses the general principles of **the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers (Charter & Code)**.

Thus, there are no restrictions of gender, national origin, race, religion, sexual orientation or age and **candidates with disabilities are strongly encouraged to apply.**

Project Manager

Infectious Diseases research group - tropical medicine

VHIR offers vacancy/vacant position for a Licensed in Medicine, to work within the [Infectious Diseases](#) research group, in Tropical Medicine.

JOB DESCRIPTION

Education and qualifications:

Required:

- University Degree in Social Science or Biomedical.
- Postgraduate in Project Management.

Experience and knowledge:

Required:

- Working experience in Europe and Latin America, managing European and International research projects.
- 3 years of experience in managing international projects in Biomedical and Social Research.
- Proactive, objectives and results oriented person.
- Relational skills and teamwork in a multicultural work environment.
- Good skills in oral and written English.

Preferred:

- Working experience in Africa.

Main responsibilities and duties:

- To support the principal investigator in the planning, management and coordination of the project portfolio. Includes monitoring of the work plan of projects, preparation of technical reports, organization of consortium meetings and preparing project presentations.
- Management of two European coordinated projects.
- To ensure that projects will be carried out in accordance with the project plan (time, cost, scope and quality).

- The area of responsibilities will include planning, steering and controlling activities, problem solution activities and corresponding administrative work. Contact point for both superior and subordinate units, thus playing a pivotal role in the management structure of the project.
