

ProteoDesign, a biotech company based in the Barcelona Science Park (Barcelona, Spain), developing novel personalized therapies to treat cancer, is looking for highly motivated **laboratory technician** to join our R&D team.

Job duties will be focused on providing lab support and carrying out chemical synthesis of amino acid derivatives, chemical bio-conjugation and analytical work.

Candidates will join as Lab Technicians and report to the Chief Technology Officer and the Project Leader.

Requirements

Academic:

Professional Training (*formació professional*) in Chemistry or Bachelor's Degree in Chemistry or Biochemistry.

Additional training and education will be valued but it is not required.

Experience:

Relevant laboratory experience (> 2 years) in chemical synthesis, purification and analysis of amino acids, peptides, oligonucleotides and protein conjugates.

Technical skills

Analytical characterization of peptides, proteins and oligonucleotides (HPLC, MS, SDS-PAGE).

Language skills

English written and spoken.

Other skills

Independent.

Highly motivated and pro-active.

Rigorous, meticulous, attention to detail.

What do we offer:

Incorporation in a highly stimulating, young and dynamic organization.

Long-term incorporation in our team.

Competitive salary.

Incorporation by May 14th 2018.

How to apply:

Please send your CV (including references) and a presentation letter to: info@proteodesign.es before May 4th.
