

Scientific lead position

[Flomics](#) is an innovative company from Barcelona developing a complete framework for the profiling and quantification of cell-free RNAs from plasma, serum or saliva samples in an automated way. At Flomics we combine expertise in genomics and bioinformatics to develop **liquid biopsies** with cell-free RNAs (cfRNAs) using **next-generation sequencing** and **machine learning**.

We are based at the [PRBB](#) and already supported by big players in the genomics fields such as Illumina. **This is an unique opportunity to be involved in the early development of a product with a strong impact in people's lives!**

You should have:

- Ph.D in Molecular biology or related field with a proven track record
- Experience with general molecular biology tasks
- Experience in Next Generation Sequencing
- Lab management skills
- Project writing and presentation skills
- Capacity to supervise students and younger members of the team
- Entrepreneurial spirit
- Excellent interpersonal skills, initiative and ability to work independently and in a high-performance team
- Professional working proficiency in English

What we offer:

- Full-time position in our office in Barcelona at the PRBB
- Salary according to experience and seniority
- Possibility of stock-options
- A challenging and motivating environment with high growth possibilities and continuous learning
