

Perdigó is a small technology development consultancy based in **Barcelona**. We work on **medical products and technology** with our clients **to change people's lives**. Projects here are diverse: from blue sky innovation to 'fast-tracked to market' developments; digital and hardware; client-funded and self-started. Within months of entering the MedTech market, we have experienced exponential growth and want to expand our team accordingly.

We are looking for a mechanical engineer with 1 or 2 years of experience in product / technology Research & Development. You would only be the second to join our MedTech team, so this is an opportunity with **huge career potential!**

To start with, you would work on the following:

- Produce technical concepts for a **new medical device**
- Design, prototype and test components and subsystems
- Generate the theoretical and empirical evidence that supports your designs
- Generate 3D CAD models
- Generate design history file documentation
- Participate in all stages of the research, design and development process: from initial brainstorming and prototypes through to start of production
- Communicate your work in a multidisciplinary environment where the status quo is challenged continuously

We are looking for applicants that meet **all** the following requirements:

- Based or willing to be based in Barcelona
- Driven to change people's lives through Medical Technologies
- Possess a mechanical engineering degree
- Have 1-2 years of experience in product / technology Research + Development
- Responsible and result oriented; professional and ambitious
- Highly skilled with Solidworks or similar CAD package

Experience in medical devices would be highly valued, though not essential.

We offer:

- A job opportunity with huge career potential
- Competitive salary
- Reasonably flexible working hours
- A steep learning curve

If you're a match and would like to work with us, please send an e-mail to arnau@perdigo.com You should quote our reference 2020Q1_R&D_eng, attach your CV, and let us know your availability for an interview. We will get back to you within 36 h!
