

Lab technician position

[Flomics](#) is an innovative company founded in 2018 with the objective to translate the usage of circulating RNAs analysis for clinical practice. We're developing a complete framework for the profiling and quantification of cell-free RNAs from plasma, serum or saliva samples in an automated way with a data analysis platform completely integrated in the cloud. Our technology will help worldwide researchers, hospitals and laboratories in getting meaningful results without the need to learn bioinformatics. It will save money, time and lives.

We're looking for a talented and motivated molecular laboratory technician to act as the support of all our current and future R&D projects with a big emphasis on Genomics and more specifically cell-free RNA sequencing.

You should have:

- Degree in Biology or related field
- A minimum of one year of experience working in a molecular biology laboratory.
- High organizational and reporting skills.
- Good experimental laboratory skills
- Entrepreneurial spirit
- Excellent interpersonal skills, initiative and ability to work independently and in a high-performance team

What will give you extra points:

- Experience in RNA handling
- Experience in Next Generation Sequencing and RNA-seq
- Professional working proficiency in English

What we offer:

- Full-time position at our laboratory in Barcelona at the PRBB (on-site position)
- Salary according to experience
- Possibility to grow professionally
- A challenging and motivating environment with high growth possibilities and continuous learning

Required information and contact:

Only applicants legally authorized to work in the EU at the time of application will be considered. If you are interested, please send an email to jobs@flomics.com with your updated CV and motivation letter
