### *Investment Analyst / Associate*

#### About Asabys Partners

Asabys Partners is an investment firm investing across the board in human healthcare. We are active in the biopharma and health-tech industries and aim to invest in highly innovative and transformative technologies. We are motivated by the idea of pushing the boundaries of science and medicine. We do this through the sourcing and financing of the most disruptive technologies, and through the collaboration with the best internal and external talents of our industry. We have an entrepreneurial spirit and seek to be involved in the building and management of our companies. Not just investors, we consider ourselves as partners and collaborators to our portfolio companies.

Asabys Partners started operations in 2019 and is currently managing approximately €120M. Since our beginnings, we have invested in 12 companies in the fields of biotechnology, medical technology and digital health in a strategy that hedges our risks while seeks high returns for our investors.

We are a team of passionate investment professionals dedicated to creating value for the society through the building and financing of companies that impact the life of patients across the globe. We work collaboratively in a multidisciplinary team and encourage the emergence of ideas that will help the company and its portfolio in their growth.

Asabys Partners is a responsible investor and in 2021, we became the first investment company in the healthcare field to be accredited for its commitment with the Sustainable Development Goals set by United Nations.

As part of its growth, Asabys Partners is seeking to hire a full-time investment analyst or associate.

#### Job Description

**Job Responsibilities:** As an analyst / associate, your role will be to source and evaluate investment opportunities, as well as prepare investment memorandums and help in the structuring and follow up of the investments. It is also expected that the successful candidate will give support to the portfolio companies along with their senior management. Furthermore, the selected candidate will need to help the team in the understanding of the needs and trends of the market. In this role, an excellent scientific, medical and technological understanding of the investment opportunities is a prerequisite. You will need to be intellectually inquisitive and open to challenging the dogmas and the status quo.

*Qualifications and Education Requirements:* We are looking for an outstanding individual with a strong scientific background (Engineering, MD and/or Ph.D.) in a relevant field (such as medicine, biomedical engineering, biotechnology) combined with a good understanding of the industry, both from the venture capital and the corporate sides. A Master's degree in Business Administration will be a plus but is not a mandatory. Previous experience in the fields of venture capital, business development or management consulting will be positively valued.

#### *Additional Skills*

The selected candidate will have an entrepreneurial mindset and will be able to work and communicate effectively with both scientific and non-scientific profiles at an international level. English proficiency is mandatory.

#### What we offer

This is a unique opportunity for personal and professional development in a dynamic, ambitious, and ethical working environment. Team members at Asabys are valued and we strive to educate and assist them in their professional development. The selected candidate will be offered a full-time position and a competitive salary package to work along with the rest of the group in Barcelona.
