

## Researcher – Cancer Research

IRBLeida – Lleida

---

We are currently seeking a highly motivated Researcher with a BSc degree to join the Group of Molecular Oncology at the Lleida Institute for Biomedical Research (IRBLeida; <http://bit.ly/molonco>). The successful candidate will work on a project aimed at characterizing the role of the small GTPase RHOA in gastric cancer using a variety of cell and molecular techniques with cell line systems, animal models and large cohorts of human primary tumors.

### **JOB DESCRIPTION**

#### **Education and qualifications:**

Required:

- Hold a Bachelor's degree in the field of biomedical sciences.

Desired:

- Hold a Master or PhD degree in the field of biomedical sciences.

#### **Experience and knowledge:**

Required to submit your application:

- Documented experience in a research laboratory.
- Experience in the field of cancer research.
- Experience with techniques of molecular/cellular biology.
- Hold the accreditation to handle laboratory animals and experience with mouse models.
- Team-work as well as independence abilities.
- Strong sense of responsibility, organization, initiative and self-motivation.

Desired:

- Good communication skills and fluency in written and spoken English.

#### **What can we offer?**

- Two-year full-time contract starting in July 2021.
- 23,000 euros/year (gross salary).
- 23 days of holidays + 9 personal days.
- Skillful and social colleagues.
- Dynamic and stimulating research environment in a leading Institute of biomedical research.

#### **How to apply:**

Applicants should submit before 16th of June 2021 a full Curriculum Vitae, a cover letter and contact details for personal references by email: [molecular.oncology@irbllleida.cat](mailto:molecular.oncology@irbllleida.cat). Please indicate "TR2021-BC Application" in the subject.
