

Bioinformatician

Nuage Therapeutics (NTx, www.nuagetx.com) is an international start-up biotechnology company located in the Barcelona Science Park (Parc Científic de Barcelona, PCB, www.pcb.ub.es).

NTx leverages biomolecular condensation and chemical biology to develop **selective inhibitors of intrinsically disordered proteins** involved in challenging indications representing unmet medical needs.

We are looking for a **bioinformatician** to join our team!

KEY RESPONSABILITIES

- Develop bioinformatic algorithms for NTx's target discovery pipeline.
- Develop new approaches to address scientific questions.
- Assist NTx's team members with bioinformatics-related analyses.
- Work in close proximity with NTx's scientific team.

REQUIREMENTS

- A Ph.D. (or corresponding experience) in Bioinformatics, Computational Biology, Computer Science, or a related field.
- Strong coding skills.
- Experience with protein sequence features and NGS analyses desired but not a must.
- Strong analytical skills.
- Self-starter able to work independently and within a dynamic multidisciplinary team.
- Good command of English.
- Excellent communication and interpersonal skills.

WHAT WE OFFER

- A **full-time and permanent position**, with a desired starting date in **February 2022**.
- The opportunity to work in a start-up biotechnology company and shape its future.
- Salary competitive to industry standards.
- The possibility of working remotely from abroad.

APPLICATION PROCEDURE

Before the 31st of January 2022, interested applicants should send their motivation letter and CV including contact information for three referees, as a single pdf to: recruitment@nuagetx.com.

For the pre-selected candidates, an interview will be scheduled.
