TWO POSTDOCTORAL POSITIONS are currently available at **XOSÉ R. BUSTELO's** group at the **CENTRO DE INVESTIGACION DEL CANCER (CIC)** of **Salamanca (Spain)** to work on the characterization of new oncogenic drivers and pathways of the RAS superfamily that are implicated in **T cell lymphomas/leukemias** (position 1) and **non-small cell lung cancer** (position 2).

We are looking for researchers with experience in some of the following techniques:

- Signal transduction and cell biology
- Molecular oncology
- Phenotypic analysis of genetically engineered mice
- Genome-wide expression and in silico analyses
- Protein purification and biochemical assays

Examples of recent publications from our lab include:

- Robles-Valero et al. *Cancer Cell* 32: 608 (2017)
- Lorenzo-Martín et al. *Nat Commun* 11: 1038 (2020)
- Rodríguez-Fdez et al. *Nat Commun* 11: 5808 (2020)
- Robles-Valero et al. *EMBO J* 40: e108125 (2021)
- Fernández-Pisonero et al. *Cell Rep* 38 :110522 (2022)

Further information about our lab can be found at:

<https://www.cicancer.org/grupo?id=33>

Information about our center can be found at:
