

Interbio Week
at IECB

June 26th-30th 2011

Interbio scientific conference

Rethinking targets for therapeutic intervention June 26-28 2011

Institut Européen de Chimie et Biologie – Bordeaux, France

Call for poster (deadline May 13th 2011)

In the context of the Interbio week at IECB (see website below), the European Institute of Chemistry and Biology (IECB) is organizing a 3-day european scientific conference entitled «Rethinking targets for therapeutic intervention». The main themes of the conference are:

- Manipulating protein networks
- New drug mechanisms
- Drugs and host environment
- Finding new therapeutic targets
- New targets for known drugs
- New approaches for drug development

Visit our website and contact your local interbio coordinator to apply for financial support.

Please register and submit your abstract at:
