

## **“Cancer Mouse Models Technician”** **Centre for Genomic Regulation (CRG)**

### **The Institute**

The Centre for Genomic Regulation (CRG) is an international biomedical research institute of excellence, based in Barcelona, Spain, with more than 400 scientists from 44 countries. The CRG shares principles of an interdisciplinary, motivated and creative scientific team that is supported by high-end and innovative technologies and a flexible and efficient administration.

CRG has been conferred with a badge of 'HR Excellence in Research' by the European Commission, in recognition to its progress in implementing the European Charter for Researchers and the Code of Conduct for Recruitment of Researchers, that among others consists of transparent, merit-based recruitment procedures and attractive work-life balance working conditions.

For further information: [www.crg.eu](http://www.crg.eu)

### **The role**

We are looking for a motivated and independent individual with experience in cancer mouse models and in molecular biology. The project is in need of a motivated researcher who will use both *in vivo* mouse models and *in vitro* cell culture systems to assess the efficacy and mechanisms of action of RNA splicing modulators with potential therapeutic effects.

### **About the team/ lab/ department**

We are an internationally-recognized laboratory focused on the study of alternative splicing regulation and its role in disease. Our group is currently developing a translational project, supported by laCaixa, European Research Council, Worldwide Cancer Research, the Catalanian Government and the CRG Technology and Business Development Office, focused on the potential therapeutic applications of alternative splicing modulation in cancer, including work *in vivo* in different mouse models of lung cancer.

### **Whom would we like to hire?**

- You have 2-4 years of experience working with mouse models and a licence (accepted by the Generalitat) to do experimental work with mice
- You have experience in cancer-related research
- You have experience in molecular biology
- You are capable of working independently under guideline supervision
- You are fluent in English
- You are a team player and enjoy challenges.

### **Desirable but not required**

- You hold a Phd in biomedicine or related fields
- You have experience in lung cancer

### The Offer

- **Contract duration:** 1 year
- **Estimated annual gross salary:** Salary is commensurate with qualifications and consistent with our pay scales.
- **Target start date:** As soon as possible

We provide a highly stimulating environment with state-of-the-art infrastructures, and unique professional career development opportunities.

We offer and promote a diverse and inclusive environment and welcomes applicants regardless of age, disability, gender, nationality, race, religion or sexual orientation.

The CRG is committed to reconcile a work and family life of its employees and are offering extended vacation period and the possibility to benefit from flexible working hours.

### Application Procedure

All applications must include:

1. A motivation letter addressed to Dr Jordi Hernández.
2. A complete CV including contact details.
3. Contact details of two referees.

All applications must be addressed to Dr Jordi Hernández and be submitted online on the CRG Career site - <http://www.crg.eu/en/content/careers/job-opportunities>

**Deadline:** Please submit your application by 29/05/2019
