NOVESEEK

Products

NOVOSEEK is an information extraction system for searching the published knowledge in biomedical literature. NOVOSEEK index the biomedical literature with a tex mining technology that enables identify uniquely the key biomedical terms. To do this unambiguous identification the technology take into account external available data and contextual term information. As a result of this technology novoseek is able to retrieve every document where a term is mention no matter the synonym used and discard those documents where the term is use with an unwanted meaning.

LIPOChip® allows a definitive genetic diagnosis of FH, a life-threatening condition that is hard to diagnose using traditional approaches. LIPOchip was the first genetic test to receive the CE mark (European Conformity). BLOODchip is a tool for genotyping nine important blood group systems. Corret matching of donor and recipient blood can reduce the incidence of alloimmunization. BLOODchip is considered by leading European and international blood transfusion centers to be the preferred blood genotyping platform for improving the safety of blood transfusions.

GENOMA ESPAÑA is a public foundation promoted by the Spanish Ministries of Science and Innovation and Health and Consumer Affairs, founded to enhance the development of the Spanish biotech sector. In order to achieve this ambitious goal, GENOMA ESPAÑA develops and coordinates public-private large-scale research projects, assesses and commercialises new technologies, promotes business cooperation and technology transfer, helps entrepreneurs to set up biotech companies and facilitates the internationalisation of the Spanish biotech companies. Researchers, public institutions as well as companies and investors take part in this project. In fact, GENOMA ESPAÑA acts as a nexus between academia and market.

BIOBASQUE

Products

BioBasque, the Basque BioRegion, is a new hub for biosciences in Europe. In the north of Spain, it offers an attractive, dynamic location for companies and other organisations searching for a good scientific and technological environment, including a robust health system, and a favourable, business-oriented framework. BioBasque encompasses all relevant stakeholders in biosciences: companies, researchers, innovation systems, investors, and public administration. Its umbrella organisation (BioBasque Agency) represents the biosciences cluster, facilitates information, networking opportunities, and participation in international bodies. For interested organisations, BioBasque offers general support to companies, links to potential partners, incubating services, financial support, good infrastructures and space.
