

CLINICAL RESEARCH PHYSICIAN

Biotechnology SME based in Palma de Mallorca, dedicated to cell therapies and plastic surgery fields is willing to incorporate a **clinical research physician**.

We are a rapidly growing start-up involved in the clinical trial space and with a high research and innovation activity. Our company operates in a private hospital providing plastic surgery services as well. We are seeking for a physician (junior or senior) with strong organization and ability to multi-task.

A junior plastic surgeon with/without professional experience willing to acquire medical experience and with a strong interest on technology transfer and research will be specially considered.

Job Description

The clinical research physician will work in a multi-disciplinary team reporting to the Project Manager and the Director, providing support for:

- Managing private consultation.
- Collaboration in medical procedures and surgeries.
- Conduction and development of clinical trials.
- Leadership and development of basic research I+D projects.

Responsibilities

- Provide medical expertise, advice, and guidance to members of the development project teams.
- Contribute clinical research and medical expertise during the execution of clinical trials. Responsible for providing support to the Clinical Coordinator for conducting clinical trials/experimental and cosmetic investigations with medical devices, including patient's consultation, medical procedures preparation, review of associated documentation.
- Providing support to the Director at the private patient's plastic surgery consultation and medical procedures.
- Co-leader of development and supervision of research projects.

Requirements

- Medical degree with a license to practice.
- Experience working with patients.
- Interest on I+D and technology transfer projects.
- Have little or no previous research experience, however, to demonstrate a strong interest in clinical research.
- Have working knowledge of GCP (ICH-GCP and local regulations compliance).

Desirable

- Plastic Surgery Specialization
- Experience in Clinical Trials with medical devices
- +5 years of work experience as a physician
- Knowledge on basic research and cell therapies field.

Conditions

- Palma de Mallorca based (travel and accommodation support for transfer will be provided if needed).
- Full time position 40 hours a week.
- Temporary labour contract 1 year + permanent extension. 3 months probationary period.
- Estimated gross annual salary will be determined according to experience and profile.

Application procedure

Applications should include CV and be sent by e-mail to: openpositionsrrhh@gmail.com before 15th February 2017. Reference CRP/15/02.

Any questions related to the position or further information requests should be addressed to openpositionsrrhh@gmail.com as well.
