

Consultant (engineer profile) Job position

GENESIS Biomed is a consultancy firm in the biomedical healthcare sector specialized in providing consulting services to spin-off and start-up companies, entrepreneurs and research centres. Based in our expertise we help entrepreneurs and researchers to shape their business plan and we support them in the private fundraising process. We have raised more than 40 M€ in the last 4 years. Our expertise domains are biopharmaceutical, biotechnological, medical devices, in vitro diagnostic, nutraceutical and cosmetic. With more than 20 years of expertise in the healthcare sector, we are born in May 2017 and we are located in the Barcelona Science Park.

Profile:

- Biomedical Engineer Bachelor or Biomedical Engineer Master.
- Advanced English.
- Valuable to have completed a master's degree in programs related to entrepreneurship.

Main Roles and Responsibilities:

- Participate in projects with Biomedical engineering profile (mainly medical devices).
- Apply knowledge in biomedical engineering for the valorisation of the project.
- Work on deliverables contributing with a scientific technical view (development plan, market studies, competition studies, IP strategy, etc).
- Integrate into the work team to carry out the necessary backoffice tasks for the good development of the ongoing projects.
- Participate in project meetings both internally and externally.
- Report to the company's Management.

Job Conditions:

Incorporation: December 2019.

Working day: 40 hours per week.

Economic conditions: negotiable depending on the candidate.
