<http://3dtechomegazeta.com/3dtoz/>

We are a young, dynamic company with a multidisciplinary team of proactive professionals working in a fast-paced content creation environment.

Company Location

Our office is located in Barcelona, near the Sants Train Station.

The Scientific Team

Our Scientific team consists of scientific writers with ample experience in the digital and audiovisual sectors. We combine a tremendous capacity for individual and multidisciplinary teamwork, being that our principal value is being able to offer maximum scientific rigour as well as the ability for working with other teams to adapt contents to a diverse choice of digital and audiovisual formats.

The Vacancy

Our current Scientific Team Director's tasks are:

- Supervises the scientific team, monitoring their work and provides training.
- Conceptualize the projects and make the scientific proposals for clients.
- Plan and monitor national and international projects effectively, making the necessary decisions and coordinating the implementation of the required tasks.
- Review scientific content to ensure maximum rigour and its adaptation to the requirements established by the client.
- Write scientific scripts for 3D animations and scientific texts for various digital formats.
- Liaison with clients.
- Liaison with KOLs.
- Work directly with C-Level leaders at the company to help grow the team and shape workflow processes.

Knowledge required

- Degree in medicine, pharmacy or biology.
- Professional English level - written and oral.
- Knowledge of scientific writing.
- Knowledge of digital audiovisual scriptwriting and storytelling.

Professional Experience Required

- More than 10 years of experience writing scientific pieces for digital and audiovisual projects (current senior level position).
- Demonstrated experience in the conceptualization and supervision of scientific projects in digital and audiovisual formats.
- Demonstrated experience in scientific scriptwriting, including writing the scripts and conceptualizing the storyboards with an illustrator.
- Demonstrated experience leading scientific writers in a digital context.
- Demonstrated experience driving innovation in a healthcare context.
- Experience as liaison with KOLs.
- Experience in the medical department of a healthcare communication agency will be valued.

Skills Required

- Leadership skills, both in managing the staff and in organizing tasks, as well as providing solutions to doubts and problems they may have.
- High concentration capacity and meticulous attention to detail in order to ensure maximum scientific accuracy.
- Ability to organize several projects concurrently with a capacity to dynamically adapt to change.
- Strong communication and interpersonal skills.
- Self-reliant and confident person capable of making sound decisions in stressful situations.

Contract period

From April to December 2020. Possible permanent incorporation in our Scientific Team.

Work Schedule

40-hour week:

- Mon-Thursday: 9:00 – 18:00
- Friday: 9:00 – 15:00

Salary

To be agreed upon with the company according to the profile and experience of the candidate (30-40.000€ annual gross wage).
