

Lead developer in bioinformatics

[Floxxics](#) is an innovative company founded in 2018 with the objective to translate the usage of circulating RNAs analysis for the clinical practice. We're developing a complete framework for the profiling and quantification of cell-free RNAs from plasma, serum or saliva samples in an automated way. Our technology will help worldwide researchers, hospitals and laboratories in getting meaningful results without the need to learn bioinformatics. It will save money, time and lifes.

We're looking for a talented and motivated Lead Developer to participate in the conceptualization and development of our platform devoted to liquid biopsies with circulating RNA. This will be a web-based interface, fully integrated in the cloud, providing useful insights to the end-users.

The position is subject to fellowship approval.

You should have:

- Ph.D in bioinformatics, Computer Science or Life sciences related field
- Experience in bioinformatics with Next Generation Sequencing
- Experience working with Git
- Knowledge of Nextflow and Docker
- Knowledge of Web development
- Entrepreneurial spirit
- Excellent interpersonal skills, initiative and ability to work independently and in a high-performance team
- Professional working proficiency in English

What we offer:

- Full-time position in our office in Barcelona
- Salary according to experience and seniority (starting at 30.000€/year)
- Possibility of stock-options
- A challenging and motivating environment with high growth possibilities and continuous learning
