Medical Devices in Adelaide Webinar

Adelaide is the ideal location for companies to establish their operations and grow their business in Asia Pacific.

At the webinar you will hear about Adelaide's advantages for:

- ✓ **Manufacturing:** automotive know-how building medical devices.
- ✓ **R&D:** 43.5% cashback
- ✓ **Sales, marketing and distribution:** Adelaide was ranked as the most cost-competitive city in Asia Pacific by KPMG on their Competitive Alternatives index.

Join our webinar to find all the benefits of Adelaide for medical devices companies.

Health Industries South Australia is a government agency helping life sciences companies to establish in Adelaide.

Adelaide BioMed City

The South Australian Government is committed to health industries. We are overseeing the final phase of construction of the \$3.6 billion Adelaide BioMed City – one of the largest life sciences clusters in the southern hemisphere, while bringing together education, research, clinical care, start-up incubation and business development.

South Australian Health and Medical Research Institute (SAHMRI)

Brings together hundreds of researchers who are divided into seven broad themes, including cancer, mind and brain, and cardiovascular. SAHMRI provides nine fully flexible wet and dry laboratories to PC2 standards.

SAHMRI 2

Housing 500 researchers over 12 levels, it will be the site of Australia's first proton therapy unit.

Royal Adelaide Hospital

Opening in a few months, the hospital will have 800 beds, with all overnight bedrooms being single rooms with private en-suites.

Hi-tech solutions will include ambulances sending patient data ahead of arrival and test results being available on monitors in patients' rooms. A fleet of robots will help move supplies and equipment around the hospital.

CMAX

Australia's most experienced Phase 1 clinical trials unit, this 50-bed facility has a database of over 15,000 healthy volunteers.

University of Adelaide

Recently opened, the university's Health and Medical Sciences Building supports medical, nursing and dentistry students, and around 400 health sciences researchers.

University of South Australia

Opening in 2018, this 14-level building will include the Centre for Cancer Biology which focusses on fundamental research relevant to many types of cancer.
