

Contact: pilar@capitalcell.net

Capital Cell's BioExpert Network is a young platform of +700 experts in science, business, finance, etc that review projects in the life science sector.

We are growing and we are looking for an intern who can:

- collect basic healthcare startup information
- help analyze the projects
- help grow the network through online and offline marketing actions
- smile every day

For this, we'd need someone with specific Healthcare knowledge (biologists, biotechnologists, biochemists, pharmacists, that sort of thing) and a keen interest in the latest technologies.

This internship is paid and there is free paella for everyone on Fridays!

Capital Cell is an online equity crowdfunding platform specialised in life science projects.
