

Job offer: Senior Scientist at Oncokids Biosciences

Oncokids Biosciences, a life science company focused on precision medicine for children with cancer, is looking for a highly motivated scientist to join the Drug Discovery division in Barcelona (Spain).

The Scientist will conduct innovative research to develop novel drugs for pediatric cancer targets and will lead a small team within the Research department in Barcelona. This position has significant visibility and potential for growth in a dynamic organization.

Requirements for candidates:

PhD in Life Science or related discipline with deep experience in oncology

Extensive laboratory experience with hands-on in molecular and cellular biology

Ability to initiate, develop and actively manage new research areas

Ability to work effectively as a member of a multi-disciplinary, regionally dispersed research team and carry out research independently, to achieve organizational goals and meet deadlines

Strong written and oral communication skills

Positive team building and teamwork skills

Experience in a similar position will be valued

Our offer:

Scientist will be part of an exciting, professional, multidisciplinary Discovery team and will contribute to experimental design for discovery program. He/She will lead internal effort while also managing external collaborations and will actively collaborate to develop innovative technical solutions to efficiently transform scientific ideas into products.

Two years position and immediate incorporation

Salary will be determined upon experience and scientific background.

Candidates should submit the CV, names and contacts of two references along with a brief cover letter describing research interests and motivation for the position to **smartifuster@oncokidsbio.com**
