

LAB MANAGER

About Leukos Biotech

Leukos Biotech is a spin-off biotech company from the Josep Carreras Leukaemia Research Institute. We focus on developing new treatments and diagnostic tools for leukemia and other neoplasms. The lead project consists in a drug repositioning for myeloid leukemias (acute myeloid leukemia, myelodysplastic syndromes) that will enter into clinical Phase IIa/b shortly. In parallel, a diagnostic kit is being developed based on the same technology. Additional R&D projects are in the pipeline targeting other hematological malignancies and solid tumors.

The postdoctoral fellow will be incorporated into a scientifically stimulating group to develop the projects that constitute the pipeline of Leukos Biotech.

Requirements:

- ▶ Education:
 - BSc and MSc in Life/Health Sciences
 - PhD in Oncology/Hematology (or related field)
 - Animal experimentation habilitation
- ▶ Professional experience:
 - Postdoctoral experience (desirable abroad)
