

Medicinal Chemist

Nuage Therapeutics (NTx, www.nuagetx.com) is an international start-up biotechnology company located in the Barcelona Science Park (Parc Científic de Barcelona, PCB, www.pcb.ub.es).

NTx leverages biomolecular condensation and chemical biology to develop **selective inhibitors of intrinsically disordered proteins** involved in challenging indications representing unmet medical needs.

We are looking for an **experienced medicinal chemist** to join our team!

KEY RESPONSABILITIES

- Select/design libraries of drug-like small molecules for screening.
- Identify new hit and lead molecules based on results from screening campaigns.
- Lead hit to lead and lead optimization efforts.
- Work in close proximity with NTx's scientific team and collaborators.

REQUIREMENTS

- B.Sc in chemistry, biochemistry or pharmacy, PhD in medicinal chemistry.
- Previous experience in drug discovery and/or drug development in a biotech or pharma company is a strict requirement.
- Self-starter able to work independently and within a dynamic multidisciplinary team.
- Good command of English.
- Excellent communication, interpersonal and management skills.

WHAT WE OFFER

- A **full-time and permanent position**, with a desired starting date in **January 2022**.
- The opportunity to work in a start-up biotechnology company and shape its future.
- Salary competitive to industry standards.
- Flexible work arrangements, including the possibility of partial remote work.

APPLICATION PROCEDURE

Before the 30th of November 2021, interested applicants should send their motivation letter and CV including contact information for three referees, as a single pdf to: recruitment@nuagetx.com.

For the pre-selected candidates, an interview will be scheduled.
