

Barcelona, June 28<sup>th</sup>, 2021

**PhD candidate position to study the molecular basis of  
neurodegenerative diseases.**

**Post description**

We are seeking for a talented and highly motivated PhD student with a master on Biomedicine, Biochemistry, Biology or similar finished in September 2021 the latest.

We offer a two-year predoctoral fellowship with the possibility for a 3<sup>rd</sup> year extension to start September-October 2021.

It will be a plus if his/her degree/master scores are 8.5 or superior to be competitive to apply also for FI, FPU or similar fellowships.

We offer the possibility to do a PhD in a highly stimulating and enriching scientific environment integrated in the Faculty of Medicine of the Universitat de Barcelona and the Hospital Clínic. We also encourage the predoctoral students to spend three months into an international lab.

The group is led by Dr. Cristina Malagelada Grau
