## **Patient Group Accelerator Programme Coordinator**

**Location:** Barcelona/Remote

**Department:** Data Science/Medical

# Who We Are

Patients living with life-limiting diseases need access to clinical trials and innovative treatments.

Aparito provides that access, wherever patients are.

We bring clinical trials to patients and unlock real-world data through mobile apps, video assessments & wearable devices through Atom5™, our iOS & Android-compatible web and mobile app platform.

Our platform integrates clinical & regulatory expertise to capture patient data and develop digital endpoints for hybrid and decentralised clinical trials to streamline the drug development process.

**Atom5™ captures multiple, high-frequency data points from video, voice, wearables and ePRO and analyses the data in conjunction with our team of data scientists to provide rich, real-time insights to clinical teams.**

# The Role

## **We are looking for a Patient Group Accelerator Programme Coordinator that's passionate about patient engagement and ...**

- Manages ongoing partnerships with Patient Advocacy Groups (PAGs) that are part of Aparito's Patient Group Accelerator Programme (PGAP).
- As part of PGAP activities related with the co-development of electronic Clinical Outcome Assessments (eCOAs) and or digital biomarkers:
  - Designs and conducts surveys/ questionnaires and/or focus groups/interviews with patients in order to identify meaningful aspects of health and analyse the results for further identification of concept(s) of interest to be measured.
  - Coordinates the selection of Atom5™ capabilities together with PAGs and reaching out to internal teams such as IT Development and/or Data Science.
  - Co-develops Atom5™ requirements specification with PAGs and liaise with Tech team for the configuration of an Atom5™ fit-for-purpose platform.
  - Maintains confidentiality about all aspects of the work.
  - Together with PAG representatives, coordinates the engagement of a small group of patients to coordinate usability testing of a fit-for-purpose Atom5™ platform.
  - Organises feedback sessions to gather patient experience with the platform.
- Supports the team in the development of new partnerships by contributing to disseminate the PGAP internally and externally.
- Is an external representative for the company in all patient advocacy/ engagement related topics.

### **Education & Experience**

- Life science degree, with experience in applying qualitative research methods in health research. MSc in related disciplines would be a welcome asset.
- Minimum of 3 years of experience in similar roles in the health care sector/patient organisations/academia.
- Fluent in English (verbal and written). Knowledge of other EU languages would be valued.

### **Skills**

- Previous experience on patient engagement, particularly in the rare disease field, with knowledge of patient engagement practices and tools.
- Strong technical skills for platforms such as JIRA, Trello, Microsoft PowerPoint, etc
- Knowledge of qualitative research methods in health research.
- Strong understanding of the clinical trial /drug development process
- Empathic and driven by patients' needs.
- Ability to clearly communicate complex concepts using plain language.
- Interest in digital health and developing solutions with a positive impact on patients' lives.
- Team-worker, able to assess priorities and to keep track of different ongoing activities.

### **What we offer**

- Full-time permanent contract (40 h/week)
- Work from home
- Annual leave
- Occasional visit to Wrexham and attendance to global conferences
