## ***PhD Student Position Cancer Epigenetics and Biology Program Aging and Cancer Group***

Bellvitge Institut for Biomedical Research (IDIBELL) offers a contract to develop a PhD in the Aging and Cancer Group lead by Dr. Purificación Muñoz Moruno, in the Cancer Epigenetics and Biology Program (PEBC).

We are looking for motivated graduated students with a good academic record (higher than 7,8), who wish to do their PhD in a scientific stimulating environment and with an interest in cancer and stem cells biology. The primary goal of our group is to study the plasticity of cancer cells in tumor progression and therapy response. In these studies we will use multidisciplinary approaches, including mouse models, cell cultures and molecular and cellular biology techniques. We encourage applications from young scientist, biologist, biochemists, veterinarians and pharmacologists. Experience in molecular and cellular biology, tissue culture, mouse handling and histology will be valued. Animal handling certification is required.

Starting date: September 2018

Applications must include a CV with a cover letter, contacts for 2 references and a copy of the academic record.

Please submit applications to: [p.munoz@idibell.cat](mailto:p.munoz@idibell.cat)
