

Celtarys Research opens a position for Biology Principal Scientist

Celtarys Research (www.celtarys.com), a newly created startup based in Santiago de Compostela (Spain), with an innovative proprietary chemical conjugation technology for the development of bioactive complex compounds, is looking for a Biology Principal Scientist.

She/He will lead the internal R&D programs in their biological perspective. R&D programs include the development of new drug candidates as well as the development of chemical biology tools for drug discovery. She/He will be also responsible for the design and coordination of the biological assessment of all chemical biology compounds generated by Celtarys' chemistry team.

We are looking for:

- A PhD with proven experience in Drug Discovery with > 4 years' experience as post doc.
- Extensive and accredited experience in:
 - Therapeutic target validation and design of screening cascades for new drug discovery programs.
 - Understanding of molecule/target interaction principles and modes.
 - Deep understanding of the biological data related to the compounds developed to incorporate them into new designs and/or potential refinement for hit to lead development
 - Knowledge of medicinal chemistry in the context of new drug modalities.
- Strong independence, problem solving, troubleshooting skills and proven ability to lead research projects.
- Responsible and goal-oriented professional, able to integrate into a multidisciplinary team and work in a competitive environment, dealing with multiple projects and client deadlines.
- Fluent in English

Responsibilities include:

- Lead and coordinate the conceptualization, design and execution of research projects for the development of new drug candidates developed applying Celtarys proprietary technology.

- Lead the biological characterization of new chemical tools, such as fluorescent ligands, developed applying Celtarys proprietary technology.
- Manage internal assigned R&D projects and clients requests.
- Collaborate with chemistry and biology colleagues locally and throughout our international network of public and private collaborators.
- Prepare R&D proposals for funding.

We offer:

- The opportunity to open and lead new research lines within a growing innovative company
- Working within a young and committed team, with a sound scientific base and a unique patented technology
- Fixed competitive salary (annual gross salary >35k) according to the experience and capabilities of the candidate
- Full time position and flexible working environment

Candidates, please send CV before March 30th to info@celtarys.com
