POSTDOCTORAL POSITION IN RNA-BASED ANTIVIRALS (INDUSTRY)

**Molecular Virology Group, Barcelona Biomedical Research Park
University Pompeu Fabra, Barcelona**

We have patented a novel RNA-based therapy with the final idea to create a spin-off company. In this context, we are looking for a postdoc with experience in RNA biology and or Virology eager to change to industry.

The Institute

Our group is integrated into the Biomedical Research Park of Barcelona (PRBB), one of the largest hubs of biomedical research in Europe. For more information please visit the web sites: <http://www.prbb.org>; <https://www.upf.edu/web/virology-unit/>

Candidate Requirements

- PhD/Postdoc in a field related to RNA biology.
- Fluency in spoken and written English.

The candidate should be highly motivated, creative and self-driven. He/she is expected to set up work standards in research quality and reproducibility, to be involved in grant writing and to be a team player.

Conditions

12 months contract (possibility to extend it one more year)
Starting date: 2020 (from May to December)

How to apply

To apply please submit the following to juana.diez@upf.edu indicating in subject "postdoctoral position industry":

- 1- A letter of interest that includes your laboratory experience, long-term career goals.
- 2- CV including the contact details of 3 referees.
- 3- 2 letters of recommendations.

Deadline application 1st of June 2020
