

Ten postdoctoral fellowships on MSCA-COFUND project “AGenT”

Centre for Research in Agricultural Genomics (CRAG) Barcelona, Spain

The MSCA-COFUND project **AGenT** (Agricultural Genomics Transversal) postdoctoral programme is advertising **ten two-year postdoctoral positions** in its 2021 call, the second call of the programme.

AGenT is an international, interdisciplinary, and intersectoral programme that combines the four scientific programmes at CRAG (Plant Development and Signal Transduction; Plant Responses to Stress; Plant Metabolism and Metabolic Engineering; and Plant and Animal Genomics) with three priority lines that are specifically supported by the three different types of partner organizations of the AGenT programme. These are:

- Collaborative international projects of research excellence
- Application of frontier technologies to plant science research and development
- From research to products

The programme is focused on: training both in specific research areas and in transferable and transversal skills; secondments and research collaborations; and networking activities in both the academic and the industrial sectors; all in order to enrich the training of the fellows and enhance their professional development while conducting projects of research excellence.

For more information about the programme and the application process please visit the Programme website: www.cofund-agent.eu

New deadline: 31st January 2022
