

Predoctoral Candidate

The Inflammatory Bowel Disease (IBD) Unit at Hospital Clinic de Barcelona (<http://www.ibd-bcn.org/>) is seeking a predoctoral candidate to fill the scholarship linked to the I+D+i project of the Spanish Ministerio de Ciencia, Innovación y Universidades.

The project “Dissecting the cellular basis of inflammatory bowel disease through single cell RNA sequencing (scRNA-Seq)” will use a cutting-edge technology that will shed a tremendous amount of useful information for complex immune-mediated diseases like IBD.

The group is looking for a highly motivated person willing to engage in the IBD Unit and in the proposed PhD project. Candidates should possess:

- B.Sc. or equivalent in Biology, Biomedical Sciences, Biotechnology, Chemistry, Pharmacy or similar.
- Recently finalized a postgraduate M. Sc in Immunology, Clinical Investigation, Bioinformatics, Omics analysis or similar.
- Fluent oral and written English.

Previous laboratory experience in similar research projects will be positively evaluated.

Candidates should send CV, cover letter, copy of BSc and MSc degree certificates and contact information for three persons of reference to asalas1@clinic.cat. Deadline is June 30th, 2019.
