

Predocctoral PhD thesis position available in 2019

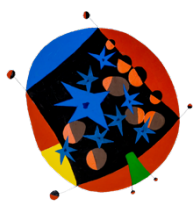

Laboratory of Cancer Stem Cell Properties and Metastasis
Celià-Terrassa Lab
Cancer Therapeutics Group, Cancer Program
Hospital del Mar Medical Research Institute (IMIM) PRBB, Barcelona, Spain.
Position topic: Tumor biology and immunotherapy of triple-negative breast cancer

A 3-year predocctoral PhD thesis position is available **to start June or July 2019** at the *Laboratory of Cancer Stem Cell Properties and Metastasis* headed by Toni Celià-Terrassa. The laboratory is part of the cancer program at the Hospital del Mar Medical Research Institute (IMIM), which is located at the Biomedical Research Park of Barcelona (PRBB). We form part of a fantastic scientific community, and highly innovative environment at the forefront of basic science and clinical research.

We are looking for a highly motivated predocctoral researcher to work on breast cancer metastasis and immunotherapy. The project aims to elucidate new immunotherapeutic strategies for triple-negative breast cancer. Previous expertise in tumor immunology and immunotherapy will be appreciated.

To apply, please send your CV, cover letter with your motivation for this position, and up to 3 scientific reference contacts (minimum one referee) to acelia@imim.es. We will consider people who made a deep thought joining the lab devoted to breast cancer research, are motivated for discoveries, success, and respectful with colleagues. Best candidates will be selected for personal interview.
