

**IQS School of Engineering**, being part of the Ramon Llull University in Barcelona, offers Bachelors in Chemistry, Chemical Engineering, Industrial Engineering, Biotechnology and Pharmacy, as well as Masters and PhD programs in science and engineering.

The Department of Chemical Engineering and Materials Science, beyond its participation in teaching Bachelor's fundamental modules courses, is responsible for teaching Chemical Engineering and related areas in Bachelors and Masters of IQS School of Engineering. IQS is currently looking for candidates starting on 2020-2021 academic year to fill de position of:

## Professor in the area of Chemical Engineering

**Associate Professor** to join the Department of Chemical Engineering and Materials Science for teaching and developing research activities as well as other academic duties. Main job functions include:

- Teaching in core courses and related courses of *Chemical Engineering* area of knowledge in the undergraduate and Master programs of IQS School of Engineering.
- Lead practical and simulation labs in chemical engineering and related areas.
- Develop research in the priority topics included in the IQS and Ramon Llull University scientific policy, integrating and coordinating with research activities of the Department of Chemical Engineering and Materials Science.
- Actively participate in research projects proposals, transfer and competitive funding and establish collaborative research programs with other professors and researchers at IQS.
- Establish and foster research partnerships internationally.

### Requirements:

- PhD in the field of chemical engineering.
- Postdoctoral or work experience in the field of Chemical Engineering will be considered.
- Proven experience in teaching at bachelor or master's level will be considered.
- Good level of English to be able to teach in this language.
- Publications in international journals and/or patents.
- Participation in competitive research projects will be considered.
- Accreditation of teaching-research activity by national evaluation agencies will be valuable, or having enough merits to obtain it.

### Career opportunity:

- Development of an academic career with promotion to the different professor categories within the Ramon Llull University rules.

To apply for this opportunity, send detailed CV: [rrhh@iqs.url.edu](mailto:rrhh@iqs.url.edu) indicating Ref. Chemical Engineering.
