**Project Manager Position
(COVINANOVAX: Diseño de una
vacuna de mRNA basada en
nanopartículas poliméricas
dirigidas a las células dendríticas)
Reference project: COV20/01100**

JOB DESCRIPTION

To participate in the Spanish project “COVINANOVAX: Diseño de una vacuna de mRNA basada en nanopartículas poliméricas dirigidas a las células dendríticas” we are looking for a **Project Manager** (PhD or equivalent), with experience in translational bioengineering research.

Position

- Project Manager (R2-R3)

Experience and knowledge

Required

- Degree in Chemistry, Biology, Pharmacy or equivalent.
- PhD in Bioengineering / Biomaterials or equivalent.
- Experience on objective oriented research projects.
- Good knowledge of lab techniques related with analytical chemistry, organic chemistry, nanotechnology, colloidal chemistry, cellular and molecular biology.
- Good level of English.

Desired

- Research experience also in immunology / infectious diseases.
- Participation in scientific articles and conference communications.
- Knowledge on biomedical application of polymers, especially in the requirements to accomplish with European regulations.

This project is financed by the Instituto de Salud Carlos III (ISCIII).
