

## PROJECT MANAGER IN THE FIELD OF DIAGNOSTICS FOR THE PTI SALUD GLOBAL (CSIC)

### The institute

The **Institute for Advanced Chemistry of Catalonia (IQAC)** is one of the research centres of the Spanish National Research Council (CSIC). The Institute is located in Barcelona and it was created in 2007 with the mission to perform research of excellence in Chemical Sciences with the broad goal of improving the quality of life. The general strategy to achieve this mission involves the application of chemical approaches to address and solve societal challenges, mainly those related to human health, the sustainability of chemical processes and products, and the needs for novel materials for different applications. Since its establishment, IQAC has been in a permanent attitude to transfer its knowledge and technology results to the industrial sector.

The research developed at IQAC is organized around two main nodes: **Biological Chemistry** and **Nanobiotechnology** and it is facilitated by a number of Key Enabling Technologies. Considering the objectives pursued, many of the investigations carried out by the Research Groups at IQAC lie at the intersection between nodes.

In addition, our Institute holds a set of scientific and technical facilities run by highly qualified scientists and technical personnel with a solid background and long lasting expertise. These facilities are available not only to IQAC research groups, but also to potential users from both academia and private institutions. In any case, the technical services from IQAC are always wide open to attend any inquiry and to offer their best efforts to find adequate responses to specific needs.

### PTI Salud Global

The Interdisciplinary Thematic Platform (PTI) Salud Global was launched by CSIC as an initiative to give response to the Covid-19 pandemic. In the PTI Salud Global, 330 research groups from different fields collaborate to address some of the main challenges posed by the SARS-CoV-2, organized by areas such as Diagnostics, Therapy or Vaccines. Scientists have come together with the aim of putting forward short, medium and, mainly, long-term solutions to fight the disease.

## The role

We offer the possibility to develop as Project Manager in the subdivision of the PTI Salud Global devoted to Diagnostics (both *in vitro* and through medical imaging), consisting of 20 national research groups. Your tasks, among others, will be:

- Continuous contact with the participating researchers and the coordinators of the WP7.
- Launching of job offers to work in the WP7 groups and accompanying through the whole hiring process.
- Communication and dissemination of the principal activities carried out.
- Organization of regular meetings and presentations preparation.
- Project monitoring through control of specific deliverables and milestones.
- Monitoring of the economic resources assigned to the different research groups.

## What do we look for?

### • Qualifications

PhD in Biotechnology/Nanotechnology/Biochemistry/Pharmacy or related

### • Professional experience

No specific experience is required. However, it will be very valuable to have knowledge on:

- Control of project indicators (deliverables, milestones, etc.)
- Scientific and management presentations preparation
- Scientific communication/dissemination

### • Competences

Excellent presentation and writing ability  
Good command of English and Spanish  
Good command of Microsoft Office

<https://www.linkedin.com/feed/update/urn:li:activity:6855875910722215936/>

## Working conditions

- **Contract duration: Until the end of 2022**
- Estimated annual gross salary: 29.271,90 €
- Target start date: 1/12/2021
- Location: IQAC / IMB-CNM (Institute of Microelectronics of Barcelona, Bellaterra)

## How to apply?

Those interested may email their **CV** and **short motivation letter** to **Dr. Francesc Bejarano** at [nb4d-projectmanager@cid.csic.es](mailto:nb4d-projectmanager@cid.csic.es) or [ptisg.diagnostico@csic.es](mailto:ptisg.diagnostico@csic.es), adding “PTI Project Manager” to the email subject.

**Deadline: 05/11/2021**

Financiado por la Unión Europea – NextGenerationEU
