

The Vall d'Hebron Institute of Oncology (VHIO) Seeks a [“Laboratory Technician”](#)

Reference: 27-2020

Application deadline: 01.02.2021

Number of vacancies: 1

Job description:

The Cellular Plasticity and Cancer Group headed by Maria Abad at VHIO, Barcelona (<http://www.vhio.net/en/cellular-plasticity-and-cancer-group/>) is currently offering a laboratory technician position.

We are looking for enthusiastic and motivated candidates with team-work skills. The successful candidate will join the scientific team supporting the development of different projects, but also will coordinate and assist lab managing duties.

Salary will be based on the specific profile and experience of the candidate.

Requirements:

- Applicants must have a BSc and demonstrated experience in molecular biology techniques and animal experimentation.
- Experience working in cancer mouse models will be favourably considered.

Application:

If you are interested, please send a letter of intent, your CV and references to mabad@vhio.net and selecciorrh@vhio.net.

HR EXCELLENCE IN RESEARCH

Vall d'Hebron Institute Oncology (VHIO) endorses the Requirements and Principles of the European Charter for Researchers, the Code of Conduct for the Recruitment of Researchers promoted by the European Commission and follows Equal Opportunities policies.

On 10th April 2018 VHIO was awarded the “HR Excellence in Research” logo. Our Institute was consequently granted permission to use the HR Excellence in Research Award logo as demonstration of its stimulating and favourable work environment in line with the Charter & Code.

About VHIO:

Under the leadership of Josep Taberero, the Vall d'Hebron Institute of Oncology (VHIO), has established itself as a comprehensive cancer center of proven excellence internationally. It is also thanks to VHIO's optimal organizational structure based on a purely multidisciplinary and translational model that VHIO talents continue to anticipate and tackle the many unresolved questions in combatting this multifaceted and heterogeneous disease.

Located within the Vall d'Hebron Barcelona Hospital Campus, our researchers closely collaborate and interact with Vall d'Hebron physician-scientists. Translational science and clinical research are therefore tightly connected which promotes superb interaction and teamwork which, in turn, accelerates the bench-bedside-bed cycle of knowledge. This privileged environment affords VHIO direct access to patients as well as the entire spectrum of oncology professionals who care for them, and a second-to-none appreciation of how cancer science can translate into more powerful, targeted treatments and better practice for the care of patients. VHIO's pioneering model and programs, coupled with its belief in combining strengths through cross-border collaborations, continue to spur advances in reversing cancer resistance, halting metastatic spread, and more effectively treating even the most undruggable tumor types.
