

HumanITcare

HumanITcare is a platform that delivers disruptive ways of monitoring real-life data on the behavior of chronic patients by using digital biomarkers. HumanITcare is improving clinical outcomes and reducing the costs of clinical research by providing an accurate remote patient monitoring system.

HumanITcare is seeking a Data Science Researcher, to lead the design and execution of algorithms models in neuroscience and be part of an amazing team of data science.

The Researcher will collaborate across the **Health Outcomes Research and Data Science** team, to generate insights into how behavioural data can be used to understand disease progression, symptoms, quality of life and other health outcomes. The researcher will work with a multidisciplinary team of the Data Science and Biostatistics teams to link results to clinical significance, both in analysis and in final report and manuscript creation.

Our company is based in the sunny Barcelona. Some travel may be required to attend at conferences.

Responsibilities

- Conduct literature reviews and research on specific disease and therapy areas to support protocol and manuscript development
- Draft clinical study protocols, informed consent forms, case report forms and other study materials for clinical trials.
- To develop the ML algorithms so that they are compatible with use in real-worldscenarios
- To liaise with third parties to validate the performance of the developed algorithms
- To write technical reports, journal articles and present in scientific conferences

QUALIFICATIONS

Minimum Qualifications

- PhD in Neuroscience, Medicine, Computer Science, Bioengineering or relateddisciplines is mandatory
- Experience with quantitative analysis methods
- Strong project management, organizational, and interpersonal communication skills
- Works well independently and with minimal direction at times
- Versatile team player with affinity for collaborative environment
- Proficient in Microsoft Word, Excel, and PowerPoint

Preferred Qualifications

- Healthcare-focused graduate degree
- Start-up or biopharma experience
- Proficient in a statistical software (e.g., R, Python, SAS, Stata)

BENEFITS

HumanITcare

- Competitive salary
- Flexible work hours
- Support for remote work when needed
- Relaxed work environment
- Lots of opportunities for growth
- Opportunity to work on fascinating challenges that improve people's lives
