

## Scientist

Nuage Therapeutics (NTx, [www.nuagetx.com](http://www.nuagetx.com)) is an international start-up biotechnology company located in the Barcelona Science Park (Parc Científic de Barcelona, PCB, [www.pcb.ub.es](http://www.pcb.ub.es)).

NTx leverages biomolecular condensation and chemical biology to develop **selective inhibitors of intrinsically disordered proteins** involved in challenging indications representing unmet medical needs.

We are looking for an **experienced cell biologist** to join our team!

### KEY RESPONSABILITIES

- Lead cell biology and molecular biology experiments.
- Design, execute and analyse experiments in an independent manner and according to company goals.
- Stay updated on new scientific discoveries.
- Design and integrate new protocols and processes.
- Participate in periodic meetings with the Scientific Team at NTx and support the decision-making process.

### REQUIREMENTS

- PhD in Biomedicine, Cell Biology, Molecular Biology, or a related field.
- Proven experience in cell biology.
- Previous experience in advanced imaging techniques will be positively valued.
- Previous experience in drug discovery will be positively valued.
- Self-starter able to work independently and within a dynamic multidisciplinary team.
- Good command of English.
- Excellent communication, interpersonal and management skills.

### WHAT WE OFFER

- A **full-time and permanent position**, with a desired starting date in **February 2022**.
- The opportunity to work in a start-up biotechnology company and shape its future.
- Salary competitive to industry standards.
- Flexible work arrangements.

### APPLICATION PROCEDURE

Before the **21<sup>st</sup> of January 2022**, interested applicants should send their motivation letter and CV including contact information for three referees, as a single pdf to: [recruitment@nuagetx.com](mailto:recruitment@nuagetx.com).

For the pre-selected candidates, an interview will be scheduled.
