“Single Cell Genomics – Two Bioinformaticians”

Centro Nacional de Análisis Genómico (CNAG-CRG)

The Institute

The Centro Nacional de Análisis Genómico (CNAG-CRG) is one of the largest Genome Sequencing Centers in Europe. CNAG-CRG researchers participate in major International Genomic Initiatives such as the International Cancer Genome Consortium (ICGC), the International Human Epigenome Consortium (IHEC), the International Rare Diseases Research Consortium (IRDiRC) and the European Infrastructure for life-science information (ELIXIR), as well as in several EU-funded projects.

It is integrated with the Centre for Genomic Regulation (CRG), an international biomedical research institute of excellence, based in Barcelona, Spain, with more than 400 scientists from 44 countries. The CRG shares principles of an interdisciplinary, motivated and creative scientific team that is supported by high-end and innovative technologies and a flexible and efficient administration.

In November 2013, the Centre for Genomic Regulation (CRG) received the ['HR Excellence in Research'](#) logo from the European Commission. This is a recognition of the Institute's commitment to developing an HR Strategy for Researchers, designed to bring the practices and procedures in line with the principles of the [European Charter for Researchers](#) and the [Code of Conduct for the Recruitment of Researchers](#) (*Charter and Code*).

[Please, check out our Recruitment Policy](#)

The role

The candidates will be integrated in the Single Cell Genomics Team, a highly collaborative, international work environment with well-experienced colleagues in single-cell data production and analysis. We have openings for Bioinformaticians through EU-funded ERC and H2020 projects. The projects the candidates will be involved aim to understand the molecular and cellular basis of diseases (mainly cancer and autoimmune) by applying multi-omic single-cell characterisation of immune and neoplastic cells, profiled throughout the course of the disease (including therapy). Topics for the positions include the development of statistical methods to integrate multi-omic single-cell and spatial data as well as clinical patient information.

We are looking for highly motivated and creative thinking individuals who are interested in working in an environment where the technical sophistication of single-cell analysis technology meets innovative approaches for interpreting data and generating new knowledge. All career stages (Master/PhD/Postdoc) are welcome to apply.

About the team

The Single Cell Genomics Team at the CNAG-CRG is dedicated to advance genome research of single cells. The mission of the group is the implementation of single-cell sequencing technologies and their application in a research and translational context. The group focuses on the systematic integration of transcriptional and epigenetic data from individual cells to elucidate causalities underlying phenotype formation. We successfully established sequencing protocols to quantify gene expression and open chromatin of thousands of single cells. Our newly developed computational pipelines include methods to deconvolute tissue composition and track to transcriptional dynamics. Our international team joins computational, technical and biological knowledge in order to establish and apply best practices in single-cell research.

centre nacional d'anàlisi genòmica
centro nacional de análisis genómico

The group combines collaborative research, development activities and follows an independent research line on translational cancer research. We are member of the Human Cell Atlas Project.

In case you are interested in our team and you are an undergraduate student, we also offer the possibility to do a PhD, pending approval of proper internal process.

Whom would we like to hire?

Professional experience

Must Have

- You have good knowledge of Computational Biology

Desirable but not required/ Nice to have

- You have experience in single-cell analysis

Education and training

- You have completed a Master or PhD in Bioinformatics, Mathematics, Statistics or similar

Languages

- You are fluent in English

Technical skills

- You are competent in Python, Perl or R.

Competences

- You are a creative thinking individual
- You have good analytical skills

The Offer – Working Conditions

- **Contract duration:** 3 years
- **Estimated annual gross salary:** Salary is commensurate with qualifications and consistent with our pay scales.
- **Target start date:** April, 2020

We provide a highly stimulating environment with state-of-the-art infrastructures, and unique professional career development opportunities. To check out our training and development portfolio, please visit our website in the [training section](#).

We offer and **promote a diverse and inclusive environment** and welcomes applicants regardless of age, disability, gender, nationality, race, religion or sexual orientation.

The **CRG is committed to reconcile a work and family life** of its employees and are offering extended vacation period and the possibility to benefit from flexible working hours.

centro nacional de análisis genómico

Application Procedure

All applications must include:

1. A motivation letter addressed to Dr. Holger Heyn
2. A complete CV including contact details.
3. Contact details of two referees.

All applications must be addressed to Dr. Holger Heyn and be submitted online on the CRG Career site - <http://www.crg.eu/en/content/careers/job-opportunities>

Selection Process

- **Pre-selection:** The pre-selection process will be based on qualifications and expertise reflected on the candidates CVS. It will be merit-based.
- **Interview:** Preselected candidates will be interviewed by the Hiring Manager of the position and a selection panel if required.
- **Offer Letter:** Once the successful candidate is identified the Human Resources department will send a Job Offer, specifying the start day, salary, working conditions, among other important details.

Deadline: Please submit your application by 15th March, 2020.

HR EXCELLENCE IN RESEARCH
