

SpliceBio is a biotech company spun out from Princeton University and based in the Barcelona Science Park (Barcelona, Spain), developing novel gene therapies to treat currently incurable genetic diseases.

SpliceBio, is looking for highly motivated **Laboratory Technician** to join our R&D team and contribute to the development of novel gene therapies.

Key duties:

- Perform molecular cloning.
- Perform experiments using molecular biology and mammalian tissue culture.
- Cell culture, maintenance of cell lines.
- Analytical characterization of proteins (SDSPAGE and WB).
- Participate in SpliceBio's scientific meetings.
- Join the R&D Team as Laboratory Technician, reporting to the lab manager and the Chief Technology Officer.

Requirements:

Academic:

Bachelor's Degree in Chemistry, Biology or Biochemistry.

Experience:

Relevant experience (> 2 years) in cloning techniques

Relevant laboratory experience (> 2 years) in mammalian tissue culture, protein expression (bacteria and mammalian), purification and characterization (SDSPAGE and WB).

Relevant experience (> 2 years) in histology.

Technical skills

Molecular biology, recombinant protein expression, protein purification. Analytical characterization of proteins (SDSPAGE and WB).

Confocal microscopy and flow cytometry.

Language skills

English written and spoken.

Other skills

Independent.

Highly motivated and pro-active.

Rigorous, meticulous, attention to detail.

What do we offer:

Incorporation in a highly stimulating, young and dynamic organization.

Long-term incorporation in our team.
Competitive salary.
Immediate incorporation.

How to apply: Please send your CV (including 2-3 contacts for references) and a presentation letter to: info@splice.bio
