

Open call for talent attraction of high-profile postdoctoral and senior researchers at IDAEA-CSIC

The Institute and the role

The Institute of Environmental Assessment and Water Research (IDAEA-CSIC) is a multidisciplinary research institute focused on the scientific understanding of key environmental challenges facing society. IDAEA's investigation, training, and education programmes cultivate fertile ground for cross-subject innovation from local to global scales. Since its foundation a decade ago IDAEA has striven to perform at an outstanding level on environmental research, guided by the principle that our scientific understanding of current threats to global ecosystems is best approached from a holistic, systems-based viewpoint. We have followed our mission to aim high by leading international projects, adopting a high profile in the scientific community, and publishing prolifically in Q1 and D1 journals. Our staff members include individuals belonging to the elite group of scientists most cited in atmospheric science and water chemistry. As a **Severo Ochoa Centre of Excellence** we have the ambition, strong analytical base, and proven record to be in an optimal research position to launch a new phase of expansion.

The Institute aims to build on the existing strong cohort of active researchers by attracting exceptional researchers who can contribute to achieving the strategic targets of our research priorities. This is being done by using open competitive calls to hire young postdoc researchers and by attracting national and international talented researchers with proven high profile success (e.g. ERC grants) at a postdoctoral or senior level. These researchers will constitute a nucleus for future projects and collaborations with EU and International Institutes.

What do we look for?

- **Requirements**
 - 3 years of postdoctoral research experience living abroad
 - Younger than 40 years old

Working conditions

- **Contract duration:** 48 months
- **Estimated annual gross salary:** Salary will commensurate with qualifications and experience, but an extra financial support of 20,000€ will be provided to help the beginning of the new researcher's activities

How to apply?

Interested applicants should submit an email (director.idaea@csic.es) with a short **CV (1-2 pages)** together with a 2-page document describing their main research line and activities to be developed at IDAEA. Please title the email: "**Talent Attraction**".

Deadline: 21st May 2021
