

## **TECHNICIAN POSITION AT CANCER EPIGENETICS AND BIOLOGY PROGRAM**

We are looking for an experienced technician to join Dr. Esteller's Cancer Epigenetics Group with expertise in cellular and molecular biology techniques (Cell culture, DNA, RNA and Protein extraction, western-blot, PCR, sequencing and transfection).

Dr. Manel Esteller is the principal investigator of Cancer Epigenetics and Biology Program. His group, in Cancer Epigenetics, is involved in the study of epigenetic mechanisms, altered in cancer cells, including aberrant changes in DNA methylation and histone modifications in cancer, study of the epigenetics machinery and associated mutations, and finally, testing of epigenetic drugs.

### **REQUIREMENTS**

---

- Minimum Laboratory FPII degree (or equivalent), with at least 3 years experience in research laboratories.
- Experience with bio/molecular techniques.
- Previous experience with sample management will be considered.
- Highly organized.
- English good communication skills.
- Motivation to achieve a high quality in your work.

### **WE OFFER**

---

- 6 months contract position with possibility of long extension.
- The opportunity to contribute to cutting-edge research projects in epigenetics.
- The opportunity to work closely with an international team of scientists and work in one of the leading epigenetics labs in Europe.

### **OTHER JOB DETAILS**

---

- Incorporation date: July 1<sup>st</sup> 2017
- Applications must include a CV and a cover letter.
- Please apply by email to: [pebc@idibell.cat](mailto:pebc@idibell.cat).
