

Job Title:
Research Project Manager

About NIVD:

NIVD is a health-tech startup, with patented cutting-edge nano-technology solutions that enable early, accurate and flexible diagnostics of multiple diseases affecting global human beings, animals, and the environment.

Together with our partners and investors, we have developed a strong ambition to enable the world with real-time, affordable point-of-care health testing solutions, that accelerate the path towards personalised medicine.

Following a successful funding round, we are expanding our Barcelona team in the R&D, Business, Commercial, and Legal areas to accelerate the delivery of our products and solutions to the market.

Job Overview:

As a Research Project Manager, you will be responsible for providing experimental scientific support and advice to NIVD, in relationship with its research projects. You will work closely with various departments and stakeholders to ensure NIVD's scientific objectives.

Responsibilities:

- Research and development of scientific projects.
- Write, review, and revise scientific papers.
- Provide scientific advice to internal stakeholders.

- Partner with other NIVD scientific departments (e.g Hospitals) to support research objectives.
- Work with external scientists as needed on specialized research matters.
- Provide training and guidance to the NIVD scientific team.
- Managing the NIVD consumable budget and expenses.

Requirements:

- Bachelor's degree in Biomedicine/ Biology degree.
- PhD in Molecular Biology/ Immunology or Similar.
- 7-10 years of experience (5+ academy Post Doc, 2+ industry)
- In-depth knowledge of experimental science on immunology and molecular biology.
- Experience in drafting various scientific documents, including research proposals.
- Expertise in bioinformatics.
- Strong analytical and problem-solving skills.
- Excellent English communication and interpersonal skills.
- Ability to work collaboratively in an Interdisciplinary research team/environment.
- Ability to manage and prioritize multiple projects and deadlines.
- Attention to detail and strong organizational skills.

What we offer:

- A competitive salary in an international working environment, benefits package, and Medical insurance (Adeslas) participation in our future stock options plan.
- Opportunities for growth and development, such as mentoring, training programs, and career advancement tracks.
- Work-life balance is critical in our DNA. We have a strong ambition to quickly

grow the business and our talent, and we want to do it while offering flexible work arrangements, such as remote work options, and flexible schedules.

- We foster a collaborative and inclusive work environment by promoting diversity, equity, and inclusion in the workplace.
- Access to cutting-edge, life-changing technology and innovative tools to help perform your job and enable your team members more efficiently and effectively.

How to Apply:

Interested candidates are invited to submit a resume and a cover letter detailing their experience and how they can contribute to our mission. Please include examples of relevant projects or products you have developed in the past.

We are committed to diversity and inclusion and encourage all qualified individuals to apply, including those with diverse backgrounds in immunology.
