

R&D Scientist - JOB OPENING

Position:	R&D Scientist
Location:	Parets del Vallès (Barcelona), Spain
Job type	Interim position (6 months, which may be extended)
Starting date	May 2024

About Theriva Biologics

Theriva Biologics SL is a highly innovative clinical-stage immuno-oncology company developing oncolytic viruses to overcome the protective barrier surrounding solid tumors and selectively kill tumor cells. We are looking for a highly motivated and experienced R&D Scientist to join our team in Parets del Vallès.

Role and Responsibilities

- Support the R&D team in the in vitro and in vivo experiments, from the design and planning to the execution, analysis, and reporting.
- Participate and present experimental results at scientific and technical meetings.
- Collaborate in the redaction of technical documents (Experimental Plans and Reports, Standard Operational Procedures, etc.).
- Direct reporting to the R&D Director.

Qualifications and skills

- Degree in Sciences (Biology, Biochemistry, Biotechnology or similar).
- Accreditation to work with mice.
- Minimum 4 years' experience in molecular and cellular biology, biochemistry, and oncology research.
- Experience in mouse models of cancer: cell line injection, drug administration, tumor measurement, mice weighting, and tissue collection.
- Industry experience is a plus.
- Fluency in English (Spanish will be considered an advantage)
- Critical Thinking
- Excellent communication skills

To apply please send your CV and motivation letter to info@therivabio.com
