

Postdoctoral Researcher at the Pluripotency for organ regeneration Research Group

Introduction to the vacant position:

The **Pluripotency for organ regeneration** Group is looking for a Postdoc to develop his/her project on the development of organoid platforms to study host-pathogen interactions. The contract will be within the framework of the “**REACT** – Respiratory Host-Pathogen Interaction” project (financed by the European Commission), **Ref. 101057129**.

Main tasks and responsibilities / The successful candidate will develop research involving:

- Generation and characterization of epithelial organoids
- Development and implementation of a microfluidic platform to study cell-to-cell and organoid-to-organoid cross-talk in control conditions and disease-like conditions.
- Scientific dissemination tasks (preparation and publication of dissemination material for REACT website and social networks, participation in the organization of REACT scientific conferences, conducting seminars, etc).

Requirements for candidates:

- PhD in biology, biotechnology, biomedical engineering, or similar areas
- Previous expertise in stem cell culture is mandatory
- Previous expertise in the characterization of organoids by conventional techniques is mandatory (RT-qPCR, immunohistochemistry, western blot).
- Previous expertise in genome editing will be a plus.
- Previous expertise in the derivation of organoids will be a plus
- Previous expertise in microfabrication techniques will be a plus
- Previous experience in confocal microscopy analysis will be a plus.
- Competencies and skills: Excellent communication and teamworking skills, proactivity, commitment, critical and analytical thinking
- High level of English

We Offer:

- Number of available positions: 1
- Starting date: Immediate
- Working conditions:
 - *Full time* contract until 31/07/2026. *Open ended*.
 - Measures to reconcile work and family life (maternity and paternity leave, flexible schedule working hours, 23 working days of paid holidays, 9 leave days for personal matters, among others).

- IBEC ensures equality of access to professional development opportunities irrespective of employment status, length at IBEC or other factors. The IBEC's yearly training catalogue offers a wide range of training in technical and transferable skills including mobility grants and a Mentoring programme.
- Stimulating, interdisciplinary research and high-quality international scientific environment.
- Induction programme to facilitate incorporation at IBEC and additional support is provided for foreigners to obtain Visa-working permit and to install in Barcelona.

How to apply:

Until August 1st an online application form is available through IBEC dedicated site:
<https://careers.ibecbarcelona.eu/>

Only those applications submitted before the deadline will be evaluated.

Principles of the selection process:

IBEC is committed to the principles of the Code of Conduct for the Recruitment of Researchers of the European Commission and the Open, Transparent and Merit based Recruitment principles (OTM-R).

IBEC's Commitment on equal opportunity:

Our strength and excellence as an international transdisciplinary Research Institute are based on diversity. Being an equal opportunity employer, we are committed to diversity and inclusion, so that we support employees irrespective of their gender, nationality, religion, disabilities, age, sexual identity or cultural and socioeconomic background."

Protection of personal information:

IBEC guarantees that candidates' personal data are processed in accordance with the requirements of the EU General Data Protection Regulation (GDPR) and Law 3/2018 on Data Protection.

Personal data will be processed solely for the purposes of the selection process.

Who we are?

The Institute for Bioengineering of Catalonia, IBEC is an interdisciplinary research center focused on Bioengineering and Nanomedicine based in Barcelona. IBEC is one of the top research institutions named as a Severo Ochoa Research Centre by the Ministry of Science, Universities and Innovation, which recognizes excellence at the highest international level in terms of research, training, human resources, outreach and technology transfer.

IBEC's mission is to develop international high-quality interdisciplinary research that, while creating knowledge, contributes to making a better quality of life, improving health and creating wealth. A close link with key universities, reference hospitals and corporations, are assets that facilitate achieving the mission.

IBEC was established in 2005 by the Generalitat de Catalunya (Autonomous Government of Catalonia), the University of Barcelona (UB) and the Technical University of Catalonia (UPC).
