

# We Are HIRING

CellFlow is an innovative deeptech startup developing advanced solutions in cell separation. Based at the *StartUB!* Incubation Center at the University of Barcelona, we're seeking passionate researchers to join our team!

## Open Positions

**Senior Researcher in Biology**  
(PhD/Postdoc)

**Junior Researcher in Biology**  
(Medical Degree or Master's in  
Biological Sciences)

### TO APPLY

Send your CV and cover letter to [bekirbelce@cell-flow.com](mailto:bekirbelce@cell-flow.com) with the subject line "Senior/Junior Researcher in Biology - [Your Name]".

## **Job Posting: Junior Researcher (Part-Time)**

### **Company Overview:**

Join CellFlow, a pioneering biotechnology startup specializing in innovative cell separation technologies from blood. Based at the StartUB! Incubation Center at the University of Barcelona, we are committed to advancing life sciences through cutting-edge research. We are currently seeking a passionate and motivated Junior Researcher in Biology to assist in the development and refinement of our cell separation technology.

### **Position Summary:**

This part-time role is ideal for candidates with a medical degree (bachelor's level) or a master's degree in biological sciences or a related field. The Junior Researcher will assist in the design and execution of experiments and be involved in laboratory work within the fields of cell biology or molecular biology.

### **Key Responsibilities:**

- Assist in the design and execution of experiments to evaluate the performance of cell separation technologies.
- Learn and apply laboratory techniques related to blood and cell separation, such as using hematology analyzers, centrifuges, PCR, and resin 3D printing.
- Support the analysis of experimental data and collaborate with senior researchers to present findings.
- Work closely with a multidisciplinary team to support the development of new features and technological advancements.
- Stay updated with relevant scientific developments and contribute to ongoing research projects.

### **Qualifications:**

- Medical degree (Bachelor's level), or a Master's degree in Biology, Molecular Biology, Biochemistry, or a related field.
- Basic experience in laboratory techniques related to blood and cell separation is a plus.
- Familiarity with data analysis and reporting.
- Ability to work both independently and collaboratively within a team environment.
- Good communication skills in English (The working language of the company is English).
- EU citizenship or a valid work permit for Spain.

### **What Will We Offer?**

- Work with a dynamic, young team at a leading startup incubation center within the University of Barcelona.
- Competitive salary based on experience.
- Flexible working hours.
- Engaging projects in an innovative environment.

### **Part-Time Schedule:**

The role requires a commitment of 20 hours per week, with flexible scheduling to accommodate academic or personal obligations. Office located in Barcelona.

### **Application Process:**

Interested candidates should submit a curriculum vitae and a brief cover letter outlining their relevant experience and research interests, along with contact information for two professional references. Selected candidates will be invited for an interview.

**Starting Date:** November 2024

### **How to Apply:**

Please send your application to [bekirbelce@cell-flow.com](mailto:bekirbelce@cell-flow.com) with the subject line "Junior Researcher - [Your Name]".

We look forward to seeing how your skills can contribute to our innovative research!
