

Job Offer- Data Scientist

DS_201907

Barcelona, Spain (Full-time)

Zymvol Biomodeling is a biotech company specialized in the discovery and development of new industrial enzymes through computer simulations. We are looking for a talented and highly motivated individual for a position as **Data Scientist**. The selected candidate should be available in October 2019.

What you can expect working at Zymvol:

Environment – We're a small but very motivated team. You'll be working in a fast-growing company with great potential to advance personally and professionally.

Attractive economic conditions – Junior €25k-€35k, Senior €35k-€45k depending on skills and experience, as well as an attractive incentive plan (including the possibility of stock options).

Benefits – Health insurance, flexible working hours and remote working.

Required Qualifications:

- MSc. or PhD. in Computational Physics, Mathematics, Bioinformatics or similar.
- Programming/scripting (e.g. Python, C++, etc.) is essential.
- Experience in at least one topic among machine learning, complex networks and information theory is essential.
- Excellent oral and written communication skills are essential.

Responsibilities:

This position will report to the head of R&D but the person is expected to be able to work independently. Responsibilities include:

- Analyze large amounts of data and model them to generate quantitative relationships with experimental data.
- Actively participate in the development of our proprietary software.
- Communicate results to head of operations.

Zymvol Biomodeling is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees. If you are interested in this position, please write to careers@zymvol.com with the subject "DS_201907". **Deadline 15th September 2019.**
